

Cautionary Note Regarding Forward-Looking Statements

Certain statements in this presentation and other publicly available documents may include, and members of management may from time to time make and discuss, statements which, to the extent they are not statements of historical or present fact, may constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Any forward-looking statement made during this presentation speaks only as of the date on which it is made. These forward-looking statements are intended to provide management's current expectations or plans for future operating and financial performance, based on assumptions currently believed to be valid and accurate. There can be no assurance that future developments affecting us will be those anticipated by management. Forward-looking statements include, without limitation, all matters that are not historical facts.

Forward-looking statements are often preceded by, followed by or include words such as "will," "believe," "anticipate," "expect," "expectations," "intend," "plan," "strategy," "prospects," "project," "anticipate," "should," "guidance," "outlook," "confident," "focused on achieving," "view," "target," "goal," "estimate" and other words of similar meaning in connection with a discussion of future operating or financial performance. These statements may include, among other things, projections, goals and assumptions that relate to future actions, prospective services or products, future performance or results of current and anticipated services or products, sales efforts, expense reduction efforts, the outcome of contingencies such as legal proceedings, anticipated organizational, business or regulatory changes, the effect of catastrophic events, both natural and man-made, and macroeconomic and/or geopolitical events, anticipated dispositions, monetization and/or acquisitions of businesses or assets, the successful integration of acquired businesses, management succession and retention plans, exposure to risk, trends in operations and financial results, and other statements that are not historical facts. All forward-looking statements involve risks, uncertainties and other factors that may cause actual results and financial condition to differ, possibly materially, from the results and financial condition expressed or implied in the forward-looking statements.

Factors that could cause actual results to differ, possibly materially, from those in specific projections, targets, goals, plans, assumptions and other forward-looking statements include, without limitation: the impact of adverse developments affecting economic conditions in the markets in which we operate in the U.S. and globally, including financial market conditions, macroeconomic trends, fluctuations in interest rates and foreign currency exchange rates, inflationary pressures, including social inflation, pressures on the commercial real estate market, and an economic slowdown or recession and geopolitical events or conflicts; the occurrence of catastrophic events, both natural and man-made, which may be exacerbated by the effects of climate change; disruptions in the availability or accessibility of our or a third party's information technology systems, including hardware and software, infrastructure or networks, and the inability to safeguard the confidentiality and integrity of customer, employee or company data due to cyberattacks, data security breaches or infrastructure vulnerabilities; our ability to effectively implement technological advancements, including the use of artificial intelligence (AI), and respond to competitors' AI and other technology initiatives; the effects of changes in laws and regulations, including those relating to privacy, data protection, cybersecurity and AI, and the regulation of insurance, in the U.S. and other countries in which we operate; our ability to successfully dispose of, monetize and/or acquire businesses or assets or successfully integrate acquired businesses, and the anticipated benefits thereof; concentrations in our investment portfolios, including our continuing equity market exposure to Corebridge Financial, Inc.; our reliance on third-party investment managers; changes in the valuation of our investments; our reliance on third parties to provide certain business and administrative services; availability of adequate reinsurance or access to reinsurance on acceptable terms; our ability to adequately assess risk and estimate related losses as well as the effectiveness of our enterprise risk management policies and procedures; changes in judgments or assumptions concerning insurance underwriting and insurance liabilities; concentrations of our insurance, reinsurance and other risk exposures; nonperformance or defaults by counterparties; the effectiveness of strategies to retain and recruit key personnel and to implement effective succession plans; difficulty in marketing and distributing products through current and future distribution channels; actions by rating agencies with respect to our credit and financial strength ratings as well as those of its businesses and subsidiaries; changes in judgments concerning the recognition of deferred tax assets and the impairment of goodwill; our ability to address evolving global stakeholder expectations and regulatory requirements with respect to environmental, social and governance matters; the effects of sanctions and the failure to comply with those sanctions; our ability to effectively implement restructuring initiatives and potential cost-savings opportunities; changes to sources of or access to liquidity; changes in accounting principles and financial reporting requirements or their applicability to us; changes to tax laws in the U.S. and other countries in which we operate; the outcome of significant legal, regulatory or governmental proceedings; our ability to effectively execute on sustainability targets and standards; the impact of epidemics, pandemics and other public health crises and responses thereto; and such other factors discussed in Part I, Item 1A, Risk Factors and Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) in AIG's Annual Report on Form 10-K for the year ended December 31, 2024 (filed with the Securities and Exchange Commission (SEC) on February 13, 2025) and our other filings with the SEC.

Forward-looking statements speak only as of the date of this presentation or in the case of any document incorporated by reference, the date of that document. AIG is not under any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law. Additional information as to factors that may cause actual results to differ materially from those expressed or implied in any forward-looking statements is disclosed from time to time in our filings with the SEC.

Non-GAAP Financial Measures

This presentation and the remarks made orally may contain certain financial measures not calculated in accordance with generally accepted accounting principles (non-GAAP). Reconciliations of non-GAAP information to GAAP for measures noted within in accordance with Regulation G are included in the appendix to this presentation. Additional reconciliations of such measures to the most comparable GAAP measures are included in Fourth Quarter 2024 Financial Supplement and company's SEC filings available in the Investor Information section of AIG's corporate website, <u>www.aig.com</u>.

Metrics Reported on Comparable Basis

This presentation and the remarks made orally related to General Insurance results, including key metrics such as Net Premiums Written, Net Premiums Earned, Losses and loss adjustment expense incurred, underwriting income, margin and underwriting leverage, are presented on a comparable basis, which reflects yearover-year comparison adjusted for the sale of Crop Risk Services and the sale of Validus Re, as applicable. We believe this presentation provides the most useful view of our results and the go forward business in light of the substantial changes to the portfolio since 2023. Please refer to the appendix for reconciliations of the metrics reported on comparable basis.

Exhibited operational excellence as a core competency

AIG 200 Established a Culture and Foundation of Operational Excellence

AIG 200 CORE PRIORITY AREAS IT Operating Model **Operations** Standard Commercial IT Modernization **Underwriting Platform** Private **Finance** Client Group Procurement Real Estate **Standards**

- Invested \$500 million to digitize commercial underwriting platform
 - Reshaped our operational infrastructure and upskilled talent
- Scaled our public cloud adoption from 20% to 80% in 2 years
 - Eliminated 1,200 legacy applications, a 30% reduction
- Modernized our data and document foundation

Divested Businesses That Were Not Core and Eliminated Significant Costs

STRATEGIC DIVESTITURES

VALIDUS RE

Travel Guard®

CROP RISK SERVICES

Private Client
SELECT

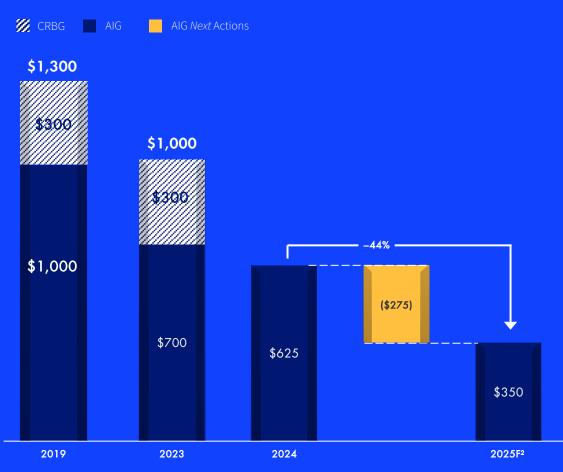

- Transferred 13,000 full-time employees, \$1.1B of cost reduction
- Eliminated \$250M of stranded costs
- Sold legacy data centers for over \$100M, reducing our annual costs by \$25M

Reduced our real estate footprint by 40%

As Part of AIG Next, We Reduced Costs While Weaving the Company Together

PARENT COMPANY EXPENSE (\$M)

Key Accomplishments

- Executing transformation with over \$500M+ exit run rate savings
- Implemented a lean parent company of \$350M, realizing our target operating structure
- Introduced US voluntary retirement program to accelerate structural changes
- Enabled future investment in GenAI, underwriting and claims capabilities

AIG Underwriter Assistance Synthesizes and Prepares Submissions for Underwriter Review Within One Day

AIG UNDERWRITER ASSISTANCE DELIVERS CURATED SUBMISSION SUMMARY

- Enables 100% submission review and faster turnaround
- Increased underwriter capacity without additional FTEs
- Enhanced data quality, uncovering more opportunities and driving improved underwriting consistency
- Higher bind ratio, fueling premium growth

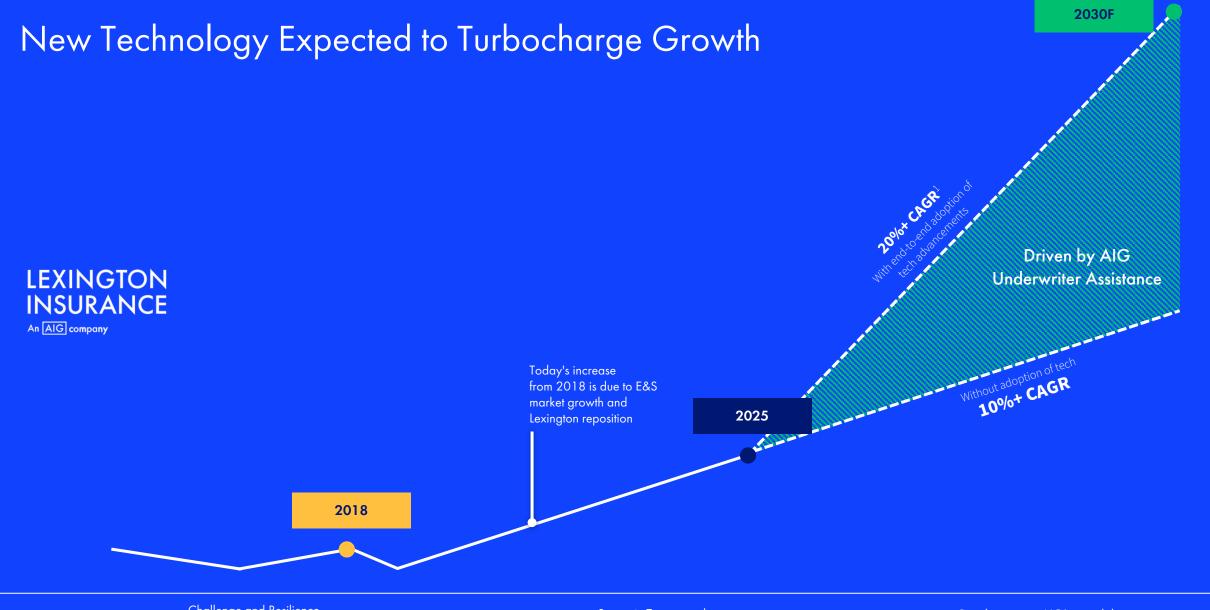

POST-AIG UNDERWRITER ASSISTANCE UNDERWRITING TIMELINE

SUBMISSION WITH AIG UNDERWRITER ASSISTANCE

UNDERWRITER ASSESSMENT

Challenge and Resilience (2015 – 2020)

Strategic Turnaround (2020 – 2025) Revolutionizing AIG's capabilities (2025 – 2030)

We Are Scaling Our GenAl Solution Capabilities Across Underwriting Products and Expanding to Claims

AIG UNDERWRITER ASSISTANCE

(In production)

INGESTION

Automatic extraction of all critical fields from broker-provided submission documents

AUGMENTATION

Curated, comprehensive submission summary augmented with key data

PRIORITIZATION

Prioritization of submissions based on appetite

AIG CLAIMS ASSISTANCE

(In progress)

Synthesis of initial claim details by automating extraction of key claim and policy information

Extraction and summary of key insights from
claim records, policy
documents,
and case files

Facilitation of content coverage review and response

We Are Scaling Our GenAl Solution Capabilities Across Underwriting Products and Expanding to Claims

AIG UNDERWRITER ASSISTANCE

(In production)

AIG CLAIMS ASSISTANCE (In progress)

KEY HIGHLIGHTS

- In production for select Financial Lines segments in the US
- Delivering key enhancements identified by underwriters (e.g., better and faster decision-making)
- Rapid scaling in progress for North America and internationally
- Incorporating learnings and capabilities from AIG Underwriter Assistance
- MVP delivered by the end of 2025
- Turbocharging Claims knowledge workers and not replacing them

What Does AIG Underwriter Assistance and AIG Claims Assistance Mean for Our Stakeholders?

CUSTOMERS

Prompt and Consistent Responses

Policies should contain more accurate coverage information and details (e.g., addresses, personnel on initial issuance and claims should be addressed more quickly)

DISTRIBUTION PARTNERS

Frictionless Trading Experience

Ease of doing business through prompt responses for quotes and swift policy issuance

EMPLOYEES

Improved Work Experience and Effectiveness

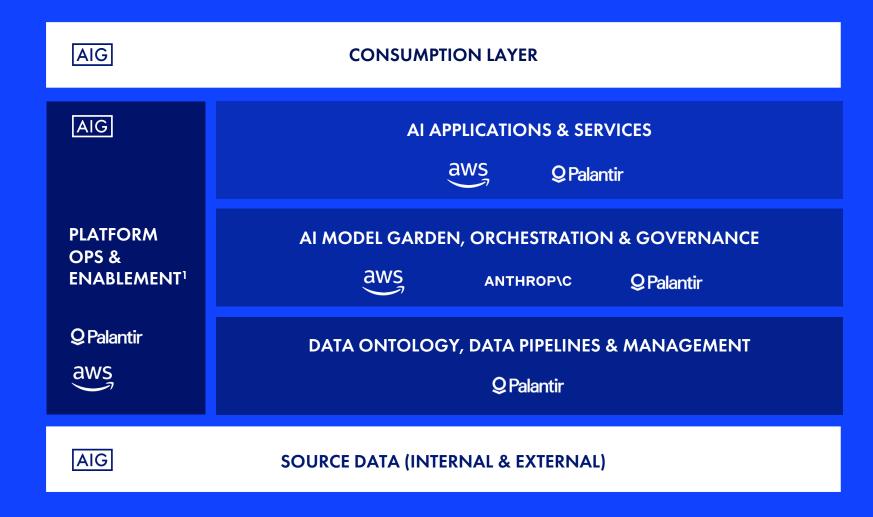

Streamlined underwriting and claims processing – data on an insured is codified and easily accessible for review and processing; technology is intuitive and enhances their day-to-day work

AIG Underwriter Assistance Component Architecture

Agentic, future-proof foundation with maximum flexibility

Efficient, scalable architecture

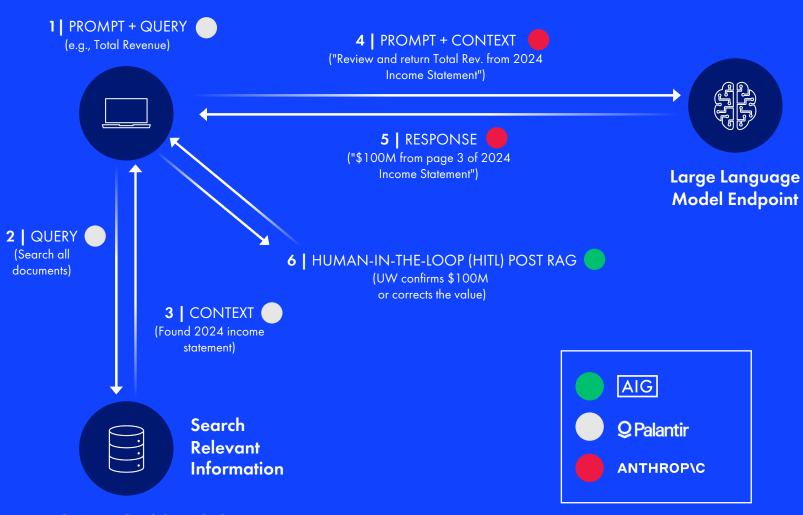

Strategic partnerships with best-in-class technologies

pendix.

Retrieval Augmented Generation (RAG)

Foundational knowledge share to simulate human analysis

- 1 Prompt: Instructions to LLM
- 2 Query: Key-word or phrase used to retrieve context
- 3 Context: Additional information to send to LLM
- 4 Prompt + Context: Instructions plus additional information sent to LLM
- 5 Response: LLM takes instructions + context and returns a response
- 6 Human in the loop review and approval

KNOWLEDGE SOURCES

Together with Our Best-in-Class Partners, We Have Built an Agentic Ecosystem that Enables and Accelerates Business Growth

ANTHROP\C1

Global Complex Insurance Underwriter and Claims Adjuster

- Deep insurance knowledge and expertise
- Clear business target and vision for growth enablers and constraints
- Extensive global data

•

Leading GenAl Company

- One of the top LLMs (Claude 3.5)
- Deep expertise in training LLMs to interpret and create human language with proper context
- A pioneer in "Constitutional AI" research, ensuring advanced AI systems remain safe

Q Palantir ¹

Leading Data and GenAl Company

- Data and analytics capability expertise
- Specialization in ingesting and connecting unstructured, structured and external data environments at scale
- Scaled digital twin of our data ecosystem
- AIP LLM prompt engineering, model integration, pipeline orchestration, E2E monitoring

INVESTOR DAY 2025

APPENDIX

IMPORTANT INFORMATION

Forecasts and projections are not guarantees of future performance and are based on management's current expectations and on assumptions currently believed to be reasonable. Our filings with the SEC provide details on important factors that could cause actual results or events to differ materially. Any forecasts or projections speak only as of the date on which they are made. Except as required by applicable securities laws, we are under no obligation to update any forecasts or projections if circumstance or management's estimates or opinions should change.

For further information and reconciliation between GAAP and the non-GAAP measures used in the presentations, see the company's SEC filings, the fourth quarter 2024 financial supplement, and this appendix.

ENDNOTES

Opening Remarks and Business Update: Chairman & CEO

AIG Accelerating Tomorrow

1. Forecasts are based on estimates and assumptions, and are subject to market conditions. Operating EPS CAGR refers to the target growth over the three year period (2025-2027). Core Operating ROE references the expected target range throughout the three year period (2025-2027). GI Expense Ratio references the target ratio to be reached within the three year period (2025-2027). Dividends Per Share CAGR refers to the target grown over 2025-2026.

<u>Global Platform - Three Diverse Operating Segments</u>

- 1. Source: AXCO 2025 Non-Life Insurance Market Reports.
- 2. Statistics reflect changes since January 1, 2017 and rounded employee counts as of December 31, 2024.

Our Businesses at a Glance

1. Global A&H includes global individual personal travel insurance and assistance business which was sold in December 2024.

Significant Multi-Year Improvement Across Both Loss and Expense Ratios

- 1. Calendar Year Combined Ratios have been restated to exclude Validus Re and Crop Risk Services for all periods, as applicable.
- 2. Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE excluding \$350M of Parent company expense for all periods presented.

<u>Substantial Combined Ratio Improvement</u>

- Calendar Year Combined Ratio has been restated to exclude Validus Re and Crop Risk Services for all periods as applicable. Fully Loaded Calendar Year Combined Ratio is the Calendar Year Loss ratio + Fully Loaded Expense Ratio. Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE excluding \$350M of Parent company expense for all periods presented.
- 2. Source: Industry average based on US Statutory filing, sourced from S&P Capital IQ.
- 3. Peer average is based on 14 companies: Chubb, Cincinnati, Travelers, WR Berkley, Hartford (P&C), CNA, Fairfax, Liberty Mutual, Markel, Allianz (P&C), AXA (P&C), QBE, Tokio Marine (P&C) and Zurich (P&C). Peer average is reflective of the undiscounted Combined Ratio for non-U.S. peers, if applicable. For Tokio Marine, P&C results are based on Tokio Marine, Nichido Fire and three North America companies (Philadelphia, Delphi and HCC).

<u>Unprecedented Improvement in Underwriting Profitability</u>

- 1. Underwriting results have been restated to exclude Validus Re and Crop Risk Services for all periods, as applicable.
- 2. For 2015 and prior, the results include Property Casualty run-off businesses, including excess workers' compensation, asbestos and environmental (1986 and prior), certain environmental liability businesses, certain healthcare coverage, certain casualty and specialty coverages reported in Eaglestone Reinsurance Company, and certain long-duration business, primarily in Japan and the U.S.

Historic Limit Reduction with NPW Growth

1. NPW has been restated to exclude Validus Re and Crop Risk Services for all periods, as applicable.

Significantly Reduced Volatility From Property Catastrophe Losses

- 1. AIG Catastrophe Losses and Reinstatement Premiums Ratio has been restated to exclude Validus Re and Crop Risk Services for all periods as applicable.
- 2. AIG CAT losses has been restated to exclude Validus Re and Crop Risk Services for all periods as applicable.
- 3. Source: Published Aon reports and reflect reported losses at the time of publication, without adjustment for inflation.
- 4. 2020 insured loss data for both the industry and AIG exclude COVID-19 losses.
- 5. AIG Share (%) calculated by dividing AIG CAT Losses by the Industry Insured Losses.

Dramatic Reduction in Severe Losses from Underwriting & Reinsurance Application

- 1. Severe losses are non-catastrophic individual first-party losses, surety and trade credit losses greater than \$10 million, net of related reinsurance and salvage and subrogation. Severe losses and Loss Ratio points have been restated to exclude Validus Re and Crop Risk Services for all periods as applicable.
- 2. Average of 2020-2024 Severe Losses compared to 2018 results.

Net Retention Reductions are Massive from 2017

- 1. North America and Japan occurrence retentions based on max any one event retention. Property Risk assumes deployed limit of \$2.25B for 2017.
- 2. U.S. and International Casualty assumes max deployed limits of \$225M and \$200M respectively for 2017, with the U.S. portfolio being protected by a 29.5% Excess quota share.

Property Catastrophe Loss Occurrence Distributions – Worldwide All Perils

1. For the 2025 modeling, output is from RMS v22 and Touchstone v10 on exposure data as of July 1, 2024. For the 2017 modeling, the North America perils are based on RMS v22 and Touchstone v10 on exposure data as of June 30, 2017. These are then scaled up to estimate Worldwide perils based on output from RMS v17 modeling on the same data.

2025 Global Casualty Program

1. Global XOL has \$765M of contract limit with a \$525M sublimit for US & Canada.

Casualty Reinstateable Limits Able to Withstand Vertical Loss and Extreme Tail Scenarios

1. Global XOL has \$765M of contract limit with a \$525M sublimit for US & Canada.

North America Excess Casualty Total Exposed Net Limit

1. Cumulative rate figures, NPW is on a calendar year basis Total exposed limit is on a July to June basis (e.g., 2024 represents July 2023 – June 2024). Total Exposed Limit xs \$25M and Cumulative Rate reflect Excess exposures only. Net Retention reflects both Primary and Excess exposures.

North America Commercial: Strong Premium Growth & Significant Combined Ratio Improvement

- 1. NPW has been restated to exclude Validus Re and Crop Risk Services for all years as applicable.
- 2. Accident Year Combined Ratios (Adj) and Calendar Year Combined Ratios have been restated to exclude Validus Re and Crop Risk Services for all periods as applicable. Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE excluding \$350M of Parent company expense for all periods presented.

North America Commercial: Strong New Business Growth For Stronger Risk-Adjusted Returns

1. All figures have been rounded.

Excess and Surplus Lines Industry Growth

- 1. NPW has been restated to exclude Validus Re and Crop Risk Services for all years as applicable.
- 2. Source: Annual P&C statutory statements. DPW reflects statutory direct written premium which excludes assumed reinsurance. 2024 DPW estimated based on S&P Data, U.S. Domestic actuals and estimated Lloyds and Other.
- 3. Refers to the target growth over the three year period (2025-2027). Forecasts are based on estimates and assumptions and are subject to market conditions.

International Commercial: Diversified, High-Quality Business

1. Property includes Package Business.

<u>International Commercial: Outstanding Portfolio, Delivered Strong Growth and Excellent Combined Ratios</u>

- 1. NPW has been restated to exclude Validus Re and Crop Risk Services and is FX adjusted for all years as applicable.
- 2. Accident Year Combined Ratios (Adj) and Calendar Year Combined Ratios have been restated to exclude Validus Re and Crop Risk Services for all periods. Fully Loaded Calendar Year Combined Ratio and Accident Year Combined Ratio (Adj) is the Loss ratio + Fully Loaded Expense Ratio (%). Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE excluding \$350M of Parent company expense for all periods presented.

International Commercial: Strong New Business

- 1. New Business figures are FX adjusted for all years.
- 2. All figures have been rounded.

Global Personal Insurance: High Potential Business

1. Accident & Health includes global individual personal travel insurance and assistance business which was sold in December 2024.

Global Personal Insurance: Scale Business, with Significant Opportunity to Improve Underwriting Margin

- 1. NPW is FX adjusted.
- 2. Accident Year Combined Ratios (Adj) and Calendar Year Combined Ratios have been restated to exclude Validus Re and Crop Risk Services for all periods. Fully Loaded Calendar Year Combined Ratio and Accident Year Combined Ratio (Adj) is the Loss ratio + Fully Loaded Expense Ratio (%). Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE excluding \$350M of Parent company expense for all periods presented.

<u>Divested businesses that were not core and eliminated significant costs</u>

- 1. Significant divestures since 2019.
- 2. All figures are rounded.

As part of AIG Next, we reduced costs while weaving the company together

- 1. All figures have been rounded. CRBG expense for 2019 is an estimate.
- 2. Forecasts are based on estimates and assumptions and are subject to market conditions.

Accelerating the End-to-End Underwriting Process By 2X-5X Using GenAl

1. All trademarks and logos used are the property of their respective owners, and their use herein does not imply endorsement.

Lexington: Exponential Growth In Submission Activity

- 1. AIG NPW has been restated to exclude Validus Re and Crop Risk Services for all years as applicable.
- 2. Source: Annual P&C statutory statements. DPW reflects statutory direct written premium which excludes assumed reinsurance. 2024 DPW estimated based on S&P Data, U.S. Domestic actuals and estimated Lloyds and Other.
- 3. Refers to the target growth over the three year period (2025-2027). Forecasts are based on estimates and assumptions and are subject to market conditions.

New Technology Expected To Turbocharge New Business Growth

1. Forecasts are based on estimates and assumptions and are subject to market conditions.

New Technology Expected To Turbocharge New Business Growth

1. Forecasts are based on estimates and assumptions and are subject to market conditions.

Significant Progress in Capital Management

- 1. Dividends are annualized based on quarterly dividends of \$0.36 and \$0.40 for 2023 and 2024, respectively.
- 2. Debt Leverage excludes Operating Debt.
- 3. Subsidiary dividends include dividends from the GI subsidiaries only.

Strengthening in General Insurance Ordinary Dividend Capacity

- 1. All figures have been rounded.
- 2. Forecasts are based on estimates and assumptions, and are subject to market conditions.

Global Personal Insurance: Underwriting Profitability Improvement Potential

- 1. Calendar Year Combined Ratio includes a fully loaded expense cost: Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE less \$350M of Parent company expense for all periods presented.
- 2. Forecasts are based on estimates and assumptions, and are subject to market conditions.

Fully Loaded Expense Ratio Expected to Continue to Decline

- 1. Ratios have been restated to exclude Validus Re and Crop Risk Services as applicable.
- 2. Fully Loaded Expense Ratio (%) = Expense Ratio + Attributed Other Operations GOE Ratio. Other Operations General Operating Expenses (GOE) attributable to General Insurance is computed as Other Operations GOE less \$350M of Parent company expense for all periods presented.

- 3. Adjusted to exclude global individual personal travel and assistance business which was sold in December 2024.
- 4. GI Expense Ratio references the target ratio to be reached within the three-year period (2025-2027). Forecasts are based on estimates and assumptions and are subject to market conditions.

Path to 10%-13% Core Operating ROE

1. Core Operating ROE references the expected target range throughout the three-year period (2025-2027). Forecasts are based on estimates and assumptions and are subject to market conditions.

Industry-Leading Operating EPS Growth

- 1. 2019-2021 reflects estimates for CRBG. 2022 and 2023 include restatements to exclude Other Operations runoff.
- 2. Forecasts are based on estimates and assumptions and are subject to market conditions.

AIG Accelerating Tomorrow

1. Forecasts are based on estimates and assumptions, and are subject to market conditions. Operating EPS CAGR refers to the target growth over the three year period (2025-2027). Core Operating ROE references the expected target range throughout the three year period (2025-2027). GI Expense Ratio references the target ratio to be reached within the three year period (2025-2027). Dividends Per Share CAGR refers to the target grown over 2025-2026.

Financial Update: CFO Update

Well Capitalized to Support Growth

1. NPW and Statutory Capital have been restated to exclude Validus Re and Crop Risk Services for all years presented, as applicable.

Sustainable Insurance Company Dividends Driven By Strong Profitability

- 1. All figures have been rounded.
- 2. Forecasts are based on estimates and assumptions, and are subject to market conditions and regulatory requirements.

Industry-Leading Debt to Total Capital Ratio

- 1. Excludes Operating Debt. Historical periods' total debt to total capital leverage ratios shown are as originally reported prior to the deconsolidation of Corebridge Financial Inc (CRBG).
- 2. Peer average is weighted by total capital. Peer group is comprised of 12 companies, AXA, Chubb, Cincinnati, Travelers, WR Berkley, Hartford, CNA, Fairfax, Liberty Mutual, Markel, QBE and Zurich.

Built Balance Sheet Strength with Financial Flexibility

Glossary of Non-GAAP Financial Measures

Throughout this presentation, we present our financial condition and results of operations in the way we believe will be most meaningful and representative of our business results. Some of the measurements we use are "Non-GAAP financial measures" under Securities and Exchange Commission rules and regulations. GAAP is the acronym for generally accepted accounting principles in the United States. The non-GAAP financial measures we present may not be comparable to similarly-named measures reported by other companies. The reconciliations of such measures to the most comparable GAAP measures in accordance with Regulation G are included within the relevant tables or in the Fourth Quarter 2024 Financial Supplement or the company's SEC filings available in the Investor Information section of AIG's website, www.aig.com.

We may use certain non-GAAP operating performance measures as forward-looking financial targets or projections. These financial targets or projections are provided based on management's estimates. The most directly comparable GAAP financial targets or projections would be heavily dependent upon results that are beyond management's control and the outcome of these items could be significantly different than management's estimates. Therefore, we do not provide quantitative reconciliations for these financial targets or projections as we cannot predict with accuracy future actual events (e.g., catastrophe losses) and impacts from changes in macro-economic market conditions, including the interest rate environment (e.g. net reserve discount change and returns on alternative investments).

We use the following operating performance measures because we believe they enhance the understanding of the underlying profitability of continuing operations and trends of our segments. We believe they also allow for more meaningful comparisons with our insurance competitors. When we use these measures, reconciliations to the most comparable GAAP measure are provided on a consolidated basis.

Adjusted Pre-tax Income (APTI) is derived by excluding the items set forth below from income from continuing operations before income tax:

- changes in the fair values of equity securities, AIG's investment in Corebridge and gain on sale of shares;
- net investment income on Fortitude Re funds withheld assets held by AIG in support of Fortitude Re's reinsurance obligations to AIG (Fortitude Re funds withheld assets);
- net realized gains and losses on Fortitude Re funds withheld assets;
- loss (gain) on extinguishment of debt;
- all net realized gains and losses except earned income (periodic settlements and changes in settlement accruals) on derivative instruments used for non-qualifying (economic) hedging or for asset replication. Earned income on such economic hedges is reclassified from net realized gains and losses to specific APTI line items based on the economic risk being hedged (e.g. net investment income);
- · income or loss from discontinued operations;
- net loss reserve discount benefit (charge);
- net results of businesses in run-off;
- pension expense related to lump sum payments to former employees;
- net gain or loss on divestitures and other;
- non-operating litigation reserves and settlements;
- restructuring and other costs related to initiatives designed to reduce operating expenses, improve efficiency and simplify our organization;
- the portion of favorable or unfavorable prior year reserve development for which we have ceded the risk under retroactive reinsurance agreements and related changes in amortization of the deferred gain;
- integration and transaction costs associated with acquiring or divesting businesses;
- · losses from the impairment of goodwill;
- · non-recurring costs associated with the implementation of non-ordinary course legal or regulatory changes or changes to accounting principles; and
- income from elimination of the international reporting lag.

Glossary of Non-GAAP Financial Measures

Adjusted After-tax Income attributable to AIG common shareholders (AATI) is derived by excluding the tax effected APTI adjustments described above, dividends on preferred stock and preferred stock redemption premiums, noncontrolling interest on net realized gains (losses), other non-operating expenses and the following tax items from net income attributable to AIG:

- deferred income tax valuation allowance releases and charges;
- · changes in uncertain tax positions and other tax items related to legacy matters having no relevance to our current businesses or operating performance; and
- net tax charge related to the enactment of the Tax Cuts and Jobs Act (Tax Act).

Return on Equity — Adjusted after-tax income excluding investments related cumulative unrealized gains and losses recorded in Accumulated other comprehensive income (loss) (AOCI) adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets (collectively, Investments AOCI), deferred tax assets (DTA) and AIG's ownership interest in Corebridge (Core Operating Return on Equity) is used to show the rate of return on common shareholders' equity excluding Investments AOCI, DTA and AIG's ownership interest in Corebridge. We believe this measure is useful to investors because it eliminates the fair value of investments that can fluctuate significantly from period to period due to changes in market conditions. We also exclude the portion of DTA representing U.S. tax attributes related to net operating loss carryforwards (NOLs), corporate alternative minimum tax credits (CAMTCs) and foreign tax credits (FTCs) that have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As NOLs, CAMTCs and FTCs are utilized, the corresponding portion of the DTA utilized is included. We exclude AIG's ownership interest in Corebridge since it is not a core long-term investment for AIG. We believe this metric will provide investors with greater insight as to the underlying profitability of our property and casualty business. Core operating return on equity is derived by dividing actual or, for interim periods, annualized adjusted after-tax income attributable to AIG common shareholders' equity, excluding Investments AOCI, DTA and AIG's ownership interest in Corebridge (AIG core operating shareholders' equity).

Ratios: We, along with most property and casualty insurance companies, use the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. These ratios are relative measurements that describe, for every \$100 of net premiums earned, the amount of losses and loss adjustment expenses (which for General Insurance excludes net loss reserve discount), and the amount of other underwriting expenses that would be incurred. A combined ratio of less than 100 indicates underwriting income and a combined ratio of over 100 indicates an underwriting loss. Our ratios are calculated using the relevant segment information calculated under GAAP, and thus may not be comparable to similar ratios calculated for regulatory reporting purposes. The underwriting environment varies across countries and products, as does the degree of litigation activity, all of which affect such ratios. In addition, investment returns, local taxes, cost of capital, regulation, product type and competition can have an effect on pricing and consequently on profitability as reflected in underwriting income and associated ratios.

Accident year loss and Accident year combined ratios, as adjusted (Accident year loss ratio, ex-CAT and Accident year combined ratio, ex-CAT): both the accident year loss and accident year combined ratios, as adjusted, exclude catastrophe losses (CATs) and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting. Natural catastrophe losses are generally weather or seismic events, in each case, having a net impact on AIG in excess of \$10 million and man-made catastrophe losses, such as terrorism and civil disorders that exceed the \$10 million threshold. We believe that as adjusted ratios are meaningful measures of our underwriting results on an ongoing basis as they exclude catastrophes and the impact of reserve discounting which are outside of management's control. We also exclude prior year development to provide transparency related to current accident year results.

Underwriting ratios are computed as follows:

- a. Loss ratio = Loss and loss adjustment expenses incurred ÷ Net premiums earned (NPE)
- b. Acquisition ratio = Total acquisition expenses ÷ NPE
- c. General operating expense ratio = General operating expenses ÷ NPE
- d. Expense ratio = Acquisition ratio + General operating expense ratio
- e. Combined ratio = Loss ratio + Expense ratio
- f. CATs and reinstatement premiums ratio = [Loss and loss adjustment expenses incurred (CATs)] ÷ [NPE +/(-) Reinstatement premiums related to catastrophes] Loss ratio
- g. Accident year loss ratio, as adjusted (AYLR, ex-CATs) = [Loss and loss adjustment expenses incurred CATs PYD] ÷ [NPE +/(-) Reinstatement premiums related to catastrophes +/(-) Prior year premiums + Adjustment for ceded premium under reinsurance contracts related to prior accident years]
- h. Accident year combined ratio, as adjusted (AYCR, ex-CATs) = AYLR ex-CATs + Expense ratio
- i. Prior year development net of reinsurance and prior year premiums ratio = [Loss and loss adjustment expenses incurred CATs PYD] ÷ [NPE +/(-) Reinstatement premiums related to catastrophes +/(-) Prior year premiums] Loss ratio CATs and reinstatement premiums ratio.

Results from discontinued operations, including Corebridge, are excluded from all of these measures

Integration and transaction costs associated with acquiring or divesting businesses	39	8		-	31
Restructuring and other costs(d)	745	156		-	589
Non-recurring costs related to regulatory or accounting changes	18	4		-	14
Noncontrolling interests(a)				478	478
Adjusted pre-tax income/Adjusted after-tax income attributable to AIG common shareholders	\$ 4,324	\$ 1,063	\$	-	\$ 3,254

⁽a) Noncontrolling interest primarily relates to Corebridge and is the portion of Corebridge earnings that AIG did not own. Corebridge is consolidated until June 9, 2024. The historical results of Corebridge owned by AIG are reflected in the Income (loss) from discontinued operations, net of income taxes.

⁽b) Includes all net realized gains and losses except earned income (periodic settlements and changes in settlement accruals) on derivative instruments used for nonqualifying (economic) hedging or for asset replication and net realized gains and losses on Fortitude Re funds withheld assets.

⁽c) In the fourth quarter of 2024, AIG realigned and began excluding the net results of run-off businesses previously reported in Other Operations from Adjusted pre-tax income. Historical results have been recast to reflect these changes.

⁽d) In the year ended December 31, 2024, Restructuring and other costs increased primarily as a result of employee-related costs, including severance, and real estate impairment charges.

Reconciliation of Adjusted After-tax Income

Years Ended December 31,	2019	2020	2021	2022	2023	2024
